By Josiah Edward Spurr

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Economic Geology of the Mercur Mining District, Utah From the base of the Wasatch Mountains on the east to that of the Sierra Nevada on the west stretches an arid region known to the early geographers as the Great American Desert, but more recently and accurately called the Great Basin, for the reason that it has no external drainage to the ocean. Geological investigation has shown that this region was once occupied by two large and distinct fresh-water seas, which have gradually disappeared by evaporation under the influence of slowly changing climatic conditions, until at the present day they are represented by relatively small saline lakes at the eastern and western extremities of the region, respectively. The Great Basin has a physical structure peculiar to itself, consisting as it does of broad, nearly level valleys from a few feet above sea-level, intersected by a series of narrow and often quite elevated mountain ridges, which trend with remarkable uniformity nearly due north and south. To these north-and-south ranges in the Great Basin, as well as to others in the...

### Reviews

*The most effective publication i ever study. I am quite late in start reading this one, but better then never. You wont sense monotony at whenever you want of your time (that's what catalogs are for concerning in the event you ask me).*

-- Prof. Erin Larson I

*This book might be worth a read, and superior to other. Of course, it really is engage in, still an interesting and amazing literature. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- Prof. Valentin Hane MD
