Reviews

The best publication i actually study. We have study and that i am certain that i will likely to study once more again later on. Your daily life span will likely be transform the instant you total reading this book.
(Mrs. Alene Leffler DVM)

EVOLUTION IN MODERN THOUGHT (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2015. Paperback. Condition: New. Large Print. Language: English . Brand New Book ***** Print on Demand *****.Ernst Heinrich Philipp August Haeckel (Potsdam, February 16, 1834 - Jena, August 8, 1919), was a biologist, philosopher and German free thinker. He made known the theories of Charles Darwin in Germany and developed a theory of human origins. Haeckel was a physician and professor of comparative anatomy and was one of the first scientists who understood the psychology as a branch of physiology. He also participated in introducing some concepts of modern biology such as those of branch or ecology. Haeckel also pointed to the policy as applied biology. He sketched on science ideology, Weltanschauung of monism and founded January 11, 1906 the Deutscher Monistenbund (monistic German law) in Jena. Ernst Haeckel contributed much through his writings to the dissemination of the theory of evolution. He is considered a pioneer of eugenics, although he has had himself no eugenic design because it escomptait, confident in the progress due to changes greater development and no degeneration. Like other freethinkers organizations, union-tier German was banned in 1933 by the Nazis. Nazi ideologues used excerpts from his writings as justification for their racist theories of social Darwinism, but at the same time declared that the essential elements of the worldview of Haeckel were inconsistent with the views of National Socialism. Resume As an epoch-marking contribution to Natural History in the widest sense, we rank the picture which Darwin gave to the world of the web of life, that is to say, of the inter-relations and linkages in Nature. For the Biology of the individual--if that be not a contradiction in terms--no idea is more fundamental than that of the correlation of organs, but Darwin s most characteristic contribution was not...
